

 AUTONOMOUS WHATSAPP COMMERCE INFRASTRUCTURE

Powering the Next Billion Merchants on WhatsApp

VendorMind transforms informal WhatsApp messages and voice notes into an automated 24/7 AI storefront, inventory fleet, and instant payment settlement engine.

10x

FASTER ORDER PROCESSING

\$100B+

EMERGING MARKET COMMERCE VOLUME

99.99%

MULTI-LLM PIPELINE RESILIENCE

The Opportunity & Market Friction

Over 85% of retail transactions in West Africa occur over WhatsApp DMs and voice notes, yet merchants lose millions due to manual bottlenecks.

40%+ Dropped Sales

Customers expect instant answers. Delayed responses during peak hours force buyers to switch to competitors within minutes.

15+ Hours Lost Weekly

Listening to long audio voice notes, copy-pasting bank account details, and manually verifying payment receipts consumes merchant workdays.

Zero App Adoption

Customers refuse to download third-party mobile apps or navigate complex e-commerce websites. They demand native WhatsApp shopping.

"Merchants don't need another web dashboard — they need an autonomous AI sales force living inside WhatsApp."

Autonomous AI Commerce Engine

VendorMind equips any vendor with a multi-modal AI agent that handles catalog discovery, voice notes, and payment settlement automatically.

Whisper Voice Note AI

Transcribes audio messages using Groq Whisper v3 in milliseconds and interprets local intent in Pidgin, English, and local dialects.

Multi-LLM Fallback

Orchestrates Groq Llama 3.3 70B, Claude 3.5 Sonnet, and Gemini Flash for sub-second responses and bulletproof 99.99% uptime.

Monnify Instant Settlement

Generates dynamic virtual accounts, verifies bank transfers automatically via webhook, and releases funds directly to merchant wallets.

Real-Time Fleet & Inventory

Syncs stock levels live across all WhatsApp agent instances.

Zero-App Customer Experience

Buyers shop naturally in WhatsApp text and voice with 0 learning curve.

Production Architecture

Distributed microservices stack built for low-latency message streaming, queue resilience, and high concurrency.

SERVICE 01

API Gateway

Fastify TypeScript REST API, Webhooks parser, authentication, and Monnify gateway.

SERVICE 02

Fleet Worker

Multi-tenant Baileys WhatsApp sockets with Redis control pub/sub and Mac OS user-agent state.

SERVICE 03

Inbound Processor

BullMQ async message queue, Groq Whisper audio transcriber, and Multi-LLM AI pipeline.

SERVICE 04

Database & State

PostgreSQL Prisma ORM with SSL connection pooling and Redis in-memory cache.

Built with Modern Monorepo Technologies

Bun Runtime, Vite + React Dashboard, Tailwind/Vanilla CSS, BullMQ, Redis, PostgreSQL, Prisma, Baileys.

MICROSERVICES READY
